DUCTLESS FUME HOOD

CRUMA G-1

The new Cruma G-1 is perfect to remove low quantities of gaseous polluting agents and/or solid particles/aerosols from its working area in a simple, secure, efficient and cost effective way, protecting both the user and the environment.

Cruma G-1 ductless fume hood uses the patented Cruma Filtration System, without any exterior duct connection. All molecular and dust particles are absorbed and retained into the filtration system.

CERTIFIED –Made in Barcelona and certified by an external laboratory according to international standards, and complying with the criteria of ISO 9001 standard.

PLUG&PLAY –It is sent from our warehouse assembled, and when unpacked it just needs to install the filters and connect into a plug.

FLEXIBLE –It can be used in hard-to-duct areas such as the center or bottom level of multi-level buildings.
TURNKEY –Installation expenses are far less than traditional hoods because no ductwork and remote blower are required.

GREEN & SUSTAINABLE –Unlike traditional fume hoods, costly tempered room air is not exhausted from the laboratory, resulting in lower energy costs.

NEW FEATURES
More information on the new LCD display

- √ New size 127x34mm display
- √ Air speed continuously monitored
- √ Type of filter installed, working hours, expiration date and next revision date
- √ Open door warning through electronic photocell
- √ Countdown timer
- √ Clock and calendar

New features and components

- √ Initial air flow cycle adequacy and final purge cycle
- √ Fault LED
- √ Control of air flow through Microprocessor
- √ Activated carbon filters with electronic chip
- √ Internal temperature sensor
- √ LED illumination

New alarms and scheduled warnings

- √ Open door warning
- √ Open door in off mode warning
- √ 60h of filter use warning
- √ Next validation warning
- √ Few hours of filter life warning
- √ Countdown timer warning
- √ Expired filter alarm (by hours)
- √ Expired filter alarm (by date)
- √ Temperature alarm
- √ Equipment without filter alarm
- √ Low barrier alarm

USES

General chemistry involving small volumes of reagents or chemical compounds at ambient/moderate temperature in all types of laboratories:

- √ Research laboratories
- √ Quality control laboratories
- √ Clinical and hospital laboratories
- √ University and school laboratories

...In general, in any kind of laboratory.

TECHNICAL FEATURES

Number of filtration columns	1
Number of filters	1 to 3
Number of IP44 fans	1
Average volume of treated air	160 m³/h
Average face velocity	0,50 m/s
Internal volume of the cabinet	0,32 m³
Renewals inside the cabinet / min	8,13
Total electrical power consumption	60 W
Power supply [1]	220-240 V ~ 50-60 Hz
LED light intensity	1275 lux
Noise level	54 dB
Packaging: 100% recycled wooden box with international phytosanitary certificate	Volume 0,80 m³
	Weight 95 Kg

[1] On request available for 110 V / 127 V.

SIZES (mm)

External Dimensions			Internal Dimensions		
Width	Depth	Height	Width	Depth	Height
797	**650**	**1195**	**776**	**600**	**762**

DUCTLESS FUME HOOD

CRUMA G-1

SIZES (mm)

SERIAL EQUIPMENT

Electronic circuit with large format LCD screen	Security levels: level 1 for users and level 2 for maintenance users
Electronic anemometer device	Electronic sensor monitoring continuously air face velocity
Photocell sensor device for open door detection	Electric device with open door alarm
Electronic control device for filters replacement	The filters incorporate a chip with USB connection that identifies the type of filter installed and the expiry date
Illumination	LED Tube high light intensity and low power consumption - 16 Watts / 1500lm
Temperature sensor	Continuous monitoring of the temperature inside the cabinet
Sampling system to analize the filtered air at the exhaust	To detect the level of filter saturation
60 hours alarm	Countdown timer according to French NF X 15-211:2009
Electronic cronometre with audible alarm	To program the work inside the fume hood
Clock and calendar	Display of date and time
Working surface 1	Spill retention tray (2-10 liters) with working surface in white tempered glass
G4 Prefilter	G4 class pre-filtering blanket of synthetic biofibres (according to EN-779) for the retention of atmospheric dust
Cable entry holes (2)	Access to the rear wall for cables and / or services entry
Chemical Listing	Guide of retained products by type of filter
Warranty	10 years

OPTIONAL EQUIPMENT

|	
Movilair	Stand with wheels and internal tray in Epoxy coated steel
Tubular steel stand	Support stand in Epoxy coated steel
Working surface 2	Spill retention tray (2-10 liters) with working surface in inox steel
Filter test kit	Dräger pump with reactive colorimetric tubes (pack 10u)

MAIN STRUCTURE

Metal parts: base frame, rear wall and head	1.2 mm galvanized coated steel with anti acid polymer resin powder heat-hardened at 200 °C
Front and side panels	Transparent polymethylmethacrylate 6 mm thick (light transmission of 93%)

DUCTLESS FUME HOOD

CRUMA G-1

FILTER TYPES

Type A	For **organic vapors** such as ketones, ethers, alcohols, xylenes … Eventually it can be used for inorganic acids, but only if used in small quantities because this activated carbon is not impregnated and the excess of acid vapors could saturate it quickly.	**Type K**	For **NH$_3$ vapors and amines**; also good for other organic compounds. Carbon with metal salt complexes impregnation.
Type BE	For **inorganic acid vapors** as H$_2$SO$_4$, HCl, HNO$_3$, and volatile sulfur compounds such as H$_2$S, SO$_3$, … It can be used with organic vapors because the activated carbon incorporates impregnation of metal compounds and neutralizing salts. It is also suitable to filter organic and inorganic compounds when they are in similar proportions.	**Type ABEK**	**Mixed type** to be used when the ratios between organic, inorganic and NH$_3$/amines are similar.
Type F	For **formaldehyde vapors** and derivatives; also good for other organic compounds. Carbon impregnated with KI, so that it should never be used with inorganic acid vapors.	**Type D**	**HEPA H-14** filter (High Efficiency Particulate Air, according to EN-1822: 2010) for filtering dust and smoke particles.

## MODULAR FILTRATION COLUMN FOR GASES AND PARTICLES (according to NFX 15-211:2009)

CLASS 2		CLASS 1	
Type G Handling of liquid compounds/products		**Type 2G** Liquid compounds/products handling with security molecular filter	
Type GS Handling of liquid and particles compounds/products		**Type 2GS** Liquid and particles compounds/products handling with molecular security filter	
		Type 2GD Handling of liquid compounds in clean room with molecular security filter	

FILTRATION COLUMN FOR POWDERS

Type D Handling of powder compounds	
Type DD Handling of powder compounds in clean room	
Type 2DD Handling of powder and molecular compounds in clean room with molecular security filter	

Fan

Molecular Filter

HEPA-H14 Filter

ACCORDING TO STANDARDS

Cabinets / Fume Hoods	AFNOR NF X 15-211:2009 (France) BS EN 14175:2012 BS 7989: 2001 (UK)
Filters	UNE EN ISO 16890:2017 EUNE EN 14387:2004 A1:2008 EN-1822:2010 (HEPA & ULPA Filters)
Quality	UNE EN ISO 9001:2015
